

EU REGULATION 2020/740

TYRE LABELLING | IVECO

carthago[®]
Das Reisemobil.

INFORMATION

The Union has committed itself to creating an energy union with a forward-looking climate policy. Fuel efficiency is a key component of the Union's 2023 climate and energy policy framework and is central to curbing energy demand.

Implementation

Regulation (EU) 2020/740 came into force on 25 June 2020. It repeals and replaces Regulation (EC) No 1222/2009 with effect from 1 May 2021, its date of application. The regulation creates a framework to provide harmonised information on tyre parameters through labelling, enabling end users to make informed decisions when purchasing tyres. The aim is to promote fuel-efficient, safe and low-noise tyres, and thus increase the economic and ecological efficiency of road traffic.

While the content and format of the tyre labelling, i.e. the tyre label, is defined in Annex II, Annex I contains regulations for testing, classification and measurement of the following parameters:

- (A) Fuel efficiency classes and rolling resistance coefficient
- (B) Wet grip classes
- (C) Classes of external rolling noise and measured values
- (D) Snow traction
- (E) Ice traction

Prior to the sale, the Carthago Group is obliged to provide end users with the label for the offered or fitted tyres, as well as the corresponding technical promotional material. It must also ensure that the product data sheet is available.

Your configured vehicle may be equipped with any of the tyre brands listed here, depending on availability at the base vehicle manufacturer and its suppliers.
